INSIGHT

The Adventurer

Adventurers are so excited to explore the unknown that when together with Rocks — consistent beacons of calm — they thrive. With Rocks reigning in the impulsiveness, this pair will be able to stay focused and creatively solve any issue. And they'll be having fun, to boot.

The Ambassador

Rocks keep a level head in any situation and Ambassadors make sure everyone has everything they need, so together they both greatly support each other. They can lose themselves in relationships if they aren't careful, but that's sometimes they're OK with that.

The Architect

With Architects' detailed plans and Rocks' calm, these 2 can be a great pair. There can be conflict if The Rock's calm seems flippant or uninterested to The Architect, but with communication, they can create the harmony they both love in a relationship.

The Contrarian

Contrarians' skeptical nature clashes somewhat with the consistency of Rocks, but with Rocks' calm that can lead to impassioned discussions about new and interesting topics. While these can take disappointing turns if not handled correctly, they can also create powerful relationships.

The Free Spirit

The balance of Rocks' calm with Free Spirits', well, free spirit, creates a pair who collects interesting experiences. While they can solve almost any outside issue, they have a tendency not to worry about their own, which can lead to unneeded stress and conflict.

The Guardian

Guardians have an intense focus for everything they do, while Rocks' relaxed approach can stress out a Guardian now and again. But when together, they can overcome their competing styles with compromise and consistent pre-planning because both of them enjoy a good plan.

The Oasis

Rocks are cool under pressure and Oases can quickly dissect any issue, so as a pair they talk through issues and can calmly solve them. But that's only if they're aware of the need to work together. Otherwise they risk staying in their solitude and stumbling because they didn't collaborate.

The Rock

It's even harder to rile up Rocks when 2 of them are partnered up. They handle stress so well alone that together they're the pinnacle of cool — always staying grounded. Though this can cause them to fall into a rut if they don't take time to focus on creating new experiences.

The Spark

Rocks are unflappable while Sparks never hide an emotion. While they differ greatly, as a pair, they can really complement each other. As long as they communicate, Sparks cause Rocks to take chances in the unknown and Rocks keep Sparks from dwelling in their own emotions.

The Storyteller

Storytellers use stress for problem-solving energy and Rocks stay calm when surrounded by stress. So together they're ready for any type of stress, financial or otherwise, just as long as they stay in close communication and balance their approaches.
